What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the Sub-Fund to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 31 August 2021 and 31 October 2022.

Moderate: this type of scenario occurred for an investment between 30 November 2016 and 30 November 2021.

Favourable: this type of scenario occurred for an investment between 29 October 2016 and 29 October 2021.

What happens if the Sub-Fund is unable to pay out?

By law, the Sub-Fund's assets may not be held in custody by the fund management company. Instead, each sub-fund must have a specific depositary that handles the safekeeping of the Sub-Fund's assets. In the event of the bankruptcy of the fund management company, the management of the Sub-Fund is taken over by the depositary. There is no other compensation or guarantee scheme for investors in the Sub-Fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario,
- 10,000 SEK is invested.

Example Investment 10,000 SEK	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	203 SEK	1,102 SEK
Annual cost impact*	2.0%	2.1%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.7% before costs and 0.6% after costs.
