Likviditetsstrategi, a sub-fund of Coeli SICAV I

Share Class: R (SEK)
ISIN: LU1720217865

Management Company:
MDO Management Company S.A.

Objectives & Investment Policy

Coeli SICAV I - Likviditetsstrategi is a fixed income fund offering active management within fixed income securities issued by corporations, financial institutions and governments mainly domiciled or active in the Nordic region. The Sub-Fund has a wide investment mandate with the possibility to invest freely in various industries and countries in the region. The Sub-Fund can invest in fixed income instruments with high credit rating and with low or no credit rating.

The Sub-Fund aims to achieve a competitive return by investing primarily in fixed income or fixed income related instruments. The Sub-Fund aims to generate return from both interest income and from price increases in the securities in which the Sub-Fund invests.

The Sub-Fund applies an active management strategy which may include investments in government and municipal bonds, convertible bonds, covered bonds, inflation-linked bonds, money market instruments and deposit accounts with credit institutions.

A significant part, or all, of the Sub-Fund's capital may be invested in high yielding sub investment grade (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies) and unrated securities. The Sub-Fund will only invest, at the time of acquisition, in fixed income securities which have an official credit rating B or above (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies). Up to 10 % of the Sub-Fund's net assets may be invested in preferred stocks and other participation rights. Up to 10 % of the Sub-Fund's net

assets may be invested in exchange traded funds ("ETFs"), UCITS and other investment funds that in all material aspects comply with the Sub-Fund's investment strategy and investment restrictions. Investments in ETFs will be restricted to European ETFs. The Sub-Fund may invest up to 20% of its net assets in asset-backed securities and mortgage-backed securities. The Sub-Fund may also invest in covered bonds.

The average duration of the Sub-Fund's investments will be actively managed and will not exceed twelve months.

The Sub-Fund may invest in assets denominated in any currency. Exposure to non-SEK denominated debt securities may be hedged back into SEK through the use of instruments such as foreign exchange forward contracts. The Sub-Fund will bear the costs incurred by such currency hedging.

The benchmark of the Fund is the OMRX T-Bill. The Sub-Fund does not intend to track the benchmark.

The fund does not distribute dividends. All income is reinvested in the fund.

The Sub-Fund will be open for subscriptions and redemptions all official Luxembourg working days under the condition that the Swedish market is open. When the Swedish market is closed, no NAV will be calculated.

Recommendation: This Sub-Fund may not be appropriate for investors who plan to withdraw their money within one year.

Risk & Reward Profile

About the indicator: The synthetic risk/reward indicator shows the relationship between risk and potential reward at an investment in the Sub-Fund. The synthetic indicator is based on the fluctuations in the Sub-Fund's value over the past five years. Where a full returns history is unavailable the indicator is based on calculations using historical market data and a hypothetical allocation according to the Sub-Fund's investment model.

About the Sub-Fund: The Sub-Fund belongs to category 1. This means that the Sub-Fund is subject to low risk in respect of rises and falls in value. Category 1 does not mean that the Sub-Fund is a risk-free investment. The Sub-Fund may over time shift to both the right and the left side of the scale. It is because the synthetic indicator is based on historical data which is not a guarantee for future risk/reward.

The Sub-Fund mainly invests in fixed income securities issued by entities that are active in the Nordic region, which generally are characterized by low to medium risks. The synthetic indicator mainly reflects the rises and falls of the assets the Sub-Fund has invested in.

Risks not captured by the indicator: Investors in the Sub-Fund need to take the following risk factors into particular consideration:

Interest rate risk -The value of the Sub-Fund's investments will be affected by changes, and shifting expectations, in interest rates in countries where it is invested.

Credit risk - The Sub-Fund primarily invests in bonds, cash and money market instruments from a range of issuers with varying credit worthiness. There is a risk that the issuer may default and not be able to meet its obligations.

Liquidity risk - There is a risk that the Sub-Fund may not be able to timely liquidate its holdings at a reasonable price.

The above mentioned list of risk factors is not exhaustive. Other factors can influence the pricing of the underlying securities and therefore this Sub-Fund.
