Risk & Reward Profile

About the indicator: The synthetic risk/reward indicator shows the relationship between risk and potential reward at an investment in the Sub-Fund. The synthetic indicator is based on the fluctuations in the Sub-Fund's value over the past five years. Where a full returns history is unavailable the indicator is based on relevant benchmark.

About the Sub-Fund: The Sub-Fund belongs to category 5. This means that the Sub-Fund is subject to higher risk in respect of rises and falls in value. Category 1 does not mean that the Sub-Fund is a risk-free investment. The Sub-Fund may over time shift to both the right and the left side of the scale. It is because the synthetic indicator is based on historical data which is not a guarantee for future risk/reward.

The Sub-Fund invests in equities and equity related instruments listed in Sweden and the Nordic region. The Fund's investment objective is generally characterized by high risk, but also potentially high return. The synthetic indicator mainly reflects the rises and falls of the equities the Sub-Fund has invested in.

Risks not captured by the indicator: Investors in the Sub-Fund need to take the following risk factors into particular consideration:

Counterparty risk – The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Sub-Fund to financial loss.

Liquidity risk – The risk that the Sub-Fund may not be able to timely liquidate its holdings at a reasonable price.

The above mentioned list of risk factors is not exhaustive. Other factors can influence the pricing of the underlying securities and therefore this Sub-Fund.
