What is this product?

Type

This is an investment fund established as a Company With Variable Capital (SICAV).

Objectives

The objective of the Sub-Fund is to achieve long term capital appreciation.

Investment policies The Sub-Fund seeks to achieve its investment objective by primarily providing exposure to companies classified by BICS (Bloomberg Industry Classification Standard) as being part of the energy, industrials, consumer discretionary, materials or utilities sectors that in the Investment Manager's own discretion are or, could be in the future affected to some extent by the energy transition.

The Sub-Fund seeks to achieve its investment objective by primarily taking long and short positions in listed equities and/or equity related financial derivative instruments.

The Sub-Fund may enter into a wide range of financial derivatives instruments, listed on any regulated market or traded over-the-counter such as but not limited to: futures, forward contracts, options.

Financial derivative instruments may be used for investment purposes. Since the Sub-Fund is authorized to invest in financial derivatives instruments and use financial techniques for the purpose of hedging and/or efficient management of the portfolio, liquid assets (including but not limited to cash, deposits and treasury bills) may, notwithstanding the ceilings set forth above, be used as collateral and may, even under normal conditions, represent more than 49% of the total net assets of the Sub-Fund.

The Sub-Fund may have a full exposure to liquid assets (including but not limited to cash, deposits and treasury bills). Such situation should not exceed a period of three months.

If the Sub-Fund uses currency hedging, the Sub-Fund may use instruments such as but not limited to FX futures, FX OTC forwards and FX Swaps.

The maximum leverage is 350% of the Net Asset Value according to both gross and commitment method.

Benchmark uses The Sub-Fund is managed actively without reference to any benchmark.

Redemption and Dealing The Sub-Fund will be open for subscriptions and redemptions all official Luxembourg working days under the condition that the New York Stock Exchange is open. When the New York Stock Exchange is closed, no NAV will be calculated.

Distribution Policy The Sub-Fund does not distribute dividends. All income is reinvested in the Sub-Fund.

Fund Currency The reference currency of the Sub-Fund is USD.

Switching between Funds Investors may switch their shares in the Sub-Fund for shares in another sub-fund within Coeli SICAV II. For further information, please refer to the prospectus which can be found on the Management Company website <https://funds.waystone.com/public> or contact your local Investor Servicing team on +46 8 506 22300.

Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium-high level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

Term

The Fund is open-ended and has no maturity date. Subject to the liquidation, dissolution and termination rights of the board of the Fund as set forth in the Fund prospectus, the Fund cannot be automatically terminated. The PRIIP manufacturer, Waystone Management Company (Lux) S.A, is not entitled to terminate the product unilaterally.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity of the Sub-Fund to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 29 January 2021 and 31 January 2024.

Moderate: this type of scenario occurred for an investment between 31 January 2019 and 31 January 2024.

Favourable: this type of scenario occurred for an investment between 29 January 2016 and 29 January 2021.

What happens if Waystone Management Company (Lux) S.A. is unable to pay out?

The Management Company has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should the Fund default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario,
- 10,000 USD is invested.

Example Investment 10,000 USD	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	364 USD	2,527 USD
Annual cost impact*	3.6%	3.9%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.6% before costs and 4.7% after costs.
